Overview

DWGs are supplemental, time-limited funding assistance provided in response to major economic dislocations or other events that cause significant impact on states and local areas that exceed the capacity of existing formula funds and other relevant resources. DWGs enable states and communities to respond to and recover from large, unexpected dislocation events.

The Department funds two types of DWGs: Disaster Recovery and Employment Recovery. Disaster Recovery DWGs provide disaster relief and humanitarian assistance employment to minimize the employment impact of disasters, in addition to employment and training services. Employment Recovery DWGs provide resources to states and other eligible applicants to respond to major economic dislocations, such as large, unexpected layoff events that cause significant job losses. This funding, which supports only employment and training activities, is intended to temporarily expand the service capacity of the state or area to serve dislocated workers, including military service members, and to meet increased demand for WIOA employment and training services caused by major dislocations, with an aim toward reemploying laid off workers and enhancing their employability and earnings.
